one of the best decision of my life ... to take Sir Aammar's Course. he is a dedicated, fierce and extremely hardworking teacher who wants to impart his all knowledge to his students (either registered or non registered) whole heartedly and want to see nation/youth putting equal effort in learning as much as we do in procrastination or ranting.

I really appreciate Dr. Ammar Tufail's teaching methods; you are truly amazing. Your teaching style has been instrumental in helping me understand the course material better, and I'm grateful for the valuable insights you provides. I look forward to continuing my learning journey with your guidance.

I had one of my best disciplined 40 Days Course AI Ka Chilla with this teacher. MashaAllah the way he explains each and everything is outstanding. From now on I can tell my friends that he is and will be my mentor, and recommend every student newly getting into Data Science/ML/DL/AI, He is the one and only. I will be thanking Youtube's algorithm that it showed me your video and channel best thing ever. Big round of applause to you sir 👏

Stay blessed and hope you achieve your dreams! 🤍

Shahid Mahmood Alam

Hi, Just finished this AI course "AI ka Chilla with Baba Aamar" which has left an indelible mark on my understanding of this recent AI revolution. I was thoroughly impressed with the course's comprehensive curriculum, excellent delivery, and overall quality. The instructor demonstrated a remarkable depth of knowledge and a passion for AI that was truly contagious. He adeptly navigated the complex concepts, making them accessible even to those with no prior experience in the field.

The course has well-structured content, which covers the following topics;

- Exploratory Data Analysis
- Prompt Engineering
- Machine Learning
- Deep Learning
- Natural Language Processing

Each module is built upon the previous one, providing a cohesive learning journey that allowed me to progressively delve deeper into AI concepts.

Moreover, the course's delivery was exceptional. The instructor used a variety of teaching methods with native examples from subcontinent life making learning fun for Urdu and Hindi audiences, including interactive discussions, case studies, and live demonstrations, which kept the sessions engaging and informative. The assignment and portfolio building with a strong emphasis on completion within a time frame were also the salient features of this course. Dr. Aamar (Baba Jee) was also highly responsive to questions, fostering an environment where every participant felt heard and supported.

Also pertinent to mention is that this was a paid course at a very nominal price but worth a lot more than that. The course content is comprehensive for beginners especially if not well conversant with Machine Learning and Deep Learning. You will need to plan sometime immediately after the end of the course to imbibe the concepts and practice the app development.

To conclude, in-depth subject knowledge, portfolio projects, how to explore academic resources and how to look for freelancing/job are my main achievements of this course.

Overall, I couldn't be more satisfied with this AI course, and I would highly recommend it to anyone looking to gain a comprehensive understanding of this rapidly evolving field.

Assalam o Alaikum, everyone! I'd like to share my experience with a course I recently took, taught by **Dr. Aammar Tufail**. This was the first online course experience in my life,I must say it was a very good experience for me. From the very beginning, I learned the importance of effective time management.
One of the most valuable aspects of this course was the wealth of knowledge and experience that Sir Aammar brought to the table.
In summary, my journey of learning artificial intelligence through this course was nothing short of superb. Each day's Zoom session was full of valuable insights, making it a truly enriching experience.

I would say it was the best investment of my life and what we have learned in this course is worth 100 times more than its registration fee. I would recommend everyone to go for any upcoming course on this platform.
